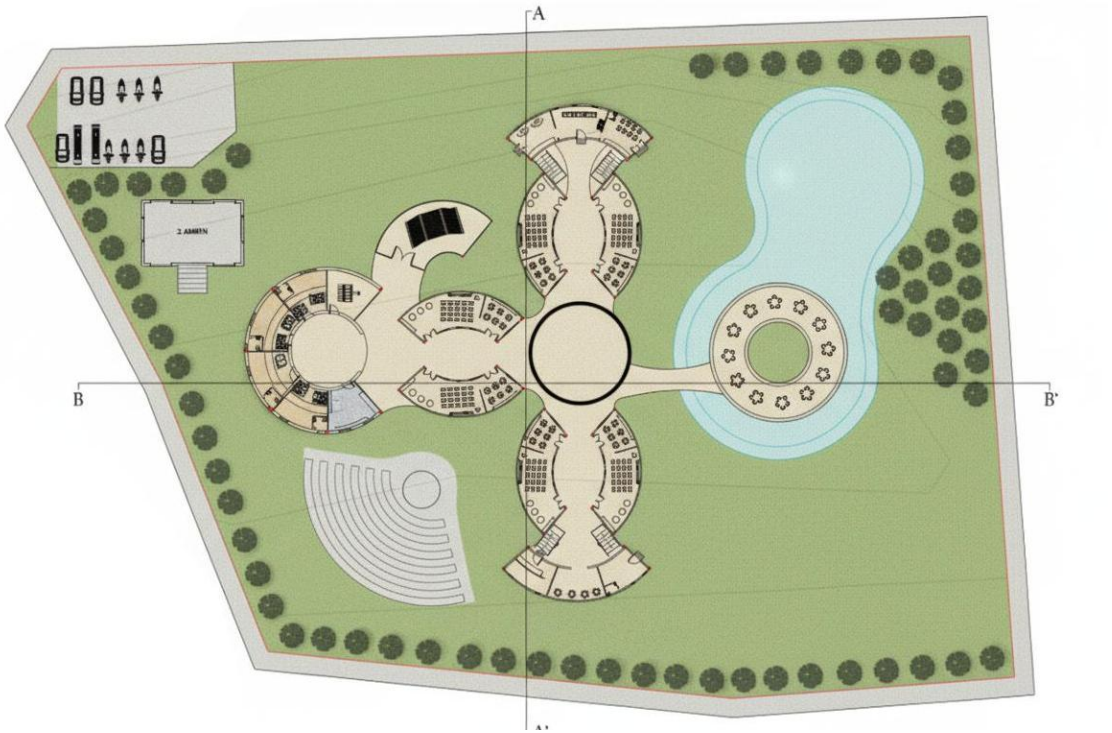
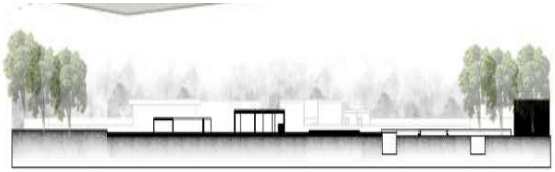
02 INSTITUTION DESIGN

A thoughtfully designed campus that provides accessible learning spaces and supportive facilities for students with special needs, promoting independence, dignity, and equal learning opportunities.

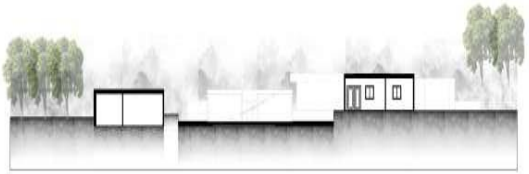
02 INCLUSIVE EDUCATION CAMPUS - BHOPAL

AREA :11,000 SQ. M



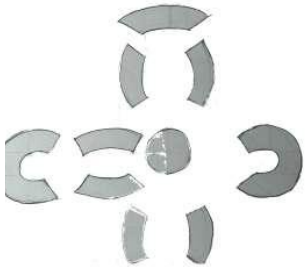


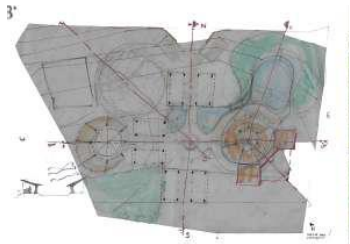
SECTION A-A'



SECTION B-B'

This project in Bhopal is a landscape-driven educational and therapy campus designed around the idea of nature as a healing environment. Low-rise structures, green roofs, water bodies, and shaded pathways create a calm, inclusive space that supports learning, therapy, and community interaction.





Form Development

The form of the campus is developed by breaking the campus into low-rise blocks arranged around green courtyards and open spaces to create a healing and nature-connected environment. The layout responds to climate, light, and movement, while pathways and water elements guide circulation and enhance the calm therapeutic atmosphere.
